FORM ADV PART 2A BROCHURE

This brochure provides information about the qualifications and business practices of Stone Wealth Partners LLC (CRD # 308429). If you have any questions about the contents of this brochure, contact us at 337-660-2334. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Stone Wealth Partners LLC is available on the SEC's website at www.adviserinfo.sec.gov.

Stone Wealth Partners LLC is a registered investment adviser. Registration with the United States Securities and Exchange Commission or any state securities authority does not imply a certain level of skill or training.

Item 2 Summary of Material Changes

Since our last annual amendment filing on March 26, 2025, there have been no material changes to our business.

In the future, this section of the Brochure will discuss only the specific material changes that were made to the Brochure and will provide you with a summary of all material changes that have occurred since the last filing of this Brochure. This section will also identify the date of our last annual Brochure update.

We will ensure that you receive a summary of any material changes to this and subsequent Brochures within 120 days of the close of our business' fiscal year end which is December 31. We will provide other ongoing disclosure information about material changes as they occur. We will also provide you with information on how to obtain the complete brochure. Currently, our Brochure may be requested at any time, without charge, by contacting Beau Wiltz at 337-660-2334 or via email at beau@stone-wealth.com.

Item 4 Advisory Business

Description of Firm

Stone Wealth Partners LLC is a registered investment adviser based in Lafayette, Louisiana. We are organized as a limited liability company ("LLC") under the laws of the State of Louisiana. We have been providing investment advisory services since April 2020. We are owned by Walter "Beau" Wiltz, IV and Richard "Alex" Hebert.

The following paragraphs describe our services and fees. Refer to the description of each investment advisory service listed below for information on how we tailor our advisory services to your individual needs. As used in this brochure, the words "we," "our," and "us" refer to Stone Wealth Partners LLC and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm.

Portfolio Management Services

We offer discretionary and non-discretionary portfolio management services. Our investment advice is tailored to meet our clients' needs and investment objectives. If you retain our firm for portfolio management services, we will meet with you to determine your investment objectives, risk tolerance, and other relevant information at the beginning of our advisory relationship. We will use the information we gather to develop a strategy that enables our firm to give you continuous and focused investment advice and/or to make investments on your behalf. As part of our portfolio management services, we may customize an investment portfolio for you according to your risk tolerance and investing objectives. We may also invest your assets according to one or more model portfolios developed by our firm. Once we construct an investment portfolio for you, or select a model portfolio, we will monitor your portfolio's performance on an ongoing basis and will re-balance the portfolio as required by changes in market conditions and in your financial circumstances.

If you participate in our discretionary portfolio management services, we require you to grant our firm discretionary authority to manage your account. Discretionary authorization will allow us to determine the specific securities, and the amount of securities, to be purchased or sold for your account without your approval prior to each transaction. Discretionary authority is typically granted by the investment advisory agreement you sign with our firm and the appropriate trading authorization forms. You may limit our discretionary authority (for example, limiting the types of securities that can be purchased or sold for your account) by providing our firm with your restrictions and guidelines in writing.

If you enter into non-discretionary arrangements with our firm, we must obtain your approval prior to executing any transactions on behalf of your account. You have an unrestricted right to decline to implement any advice provided by our firm on a non-discretionary basis.

As mentioned above, we may invest your assets according to one or more model portfolios developed by our firm. These models are designed for investors with varying degrees of risk tolerance ranging from a more aggressive investment strategy to a more conservative investment approach. Clients whose assets are invested in model portfolios may not set restrictions on the specific holdings or allocations within the model, nor the types of securities that can be purchased in the model.

Financial Planning Services

We offer financial planning services which typically involve providing a variety of advisory services to clients regarding the management of their financial resources based upon an analysis of their individual needs. These services can range from broad-based financial planning to consultative or single subject planning. If you retain our firm for financial planning services, we will meet with you to gather information about your financial circumstances and objectives. We may also use financial planning software to determine your current financial position and to define and quantify your long-term

goals and objectives. Once we specify those long-term objectives (both financial and non-financial), we will develop shorter-term, targeted objectives. Once we review and analyze the information you provide to our firm and the data derived from our financial planning software, we will deliver a written plan to you, designed to help you achieve your stated financial goals and objectives.

Financial plans are based on your financial situation at the time we present the plan to you, and on the financial information you provide to us. You must promptly notify our firm if your financial situation, goals, objectives, or needs change.

You are under no obligation to act on our financial planning recommendations. Should you choose to act on any of our recommendations, you are not obligated to implement the financial plan through any of our other investment advisory services. Moreover, you may act on our recommendations by placing securities transactions with any brokerage firm.

Financial Consulting Services

We offer financial consulting services that primarily involve advising clients on specific financial-related topics. The topics we address may include, but are not limited to, income analysis, cash flow analysis, budget analysis, investment analysis, asset allocation, education needs and planning analysis, retirement needs and planning analysis, retirement plan review, life insurance review, disability insurance review, estate analysis, estate planning, charitable giving, employee benefit analysis, investment counseling, portfolio monitoring, group retirement enrollment, education meetings, and ongoing investment advisory consulting.

Pension Consulting Services

We offer pension consulting services to employee benefit plans and their fiduciaries based upon the needs of the plan and the services requested by the plan sponsor or named fiduciary. In general, these services may include an existing plan review and analysis, plan-level advice regarding fund selection and investment options, education services to plan participants, investment performance monitoring, and/or ongoing consulting. These pension consulting services will generally be non-discretionary and advisory in nature. The ultimate decision to act on behalf of the plan shall remain with the plan sponsor or other named fiduciary.

We may also assist with participant enrollment meetings and provide investment-related educational seminars to plan participants on such topics as:

- Diversification
- Asset allocation
- Risk tolerance
- Time horizon

Our educational seminars may include other investment-related topics specific to the particular plan. Our educational seminars are free of charge.

We may also provide additional types of pension consulting services to plans on an individually negotiated basis. All services, whether discussed above or customized for the plan based upon requirements from the plan fiduciaries (which may include additional plan-level or participant-level services) shall be detailed in a written agreement and be consistent with the parameters set forth in the plan documents.

Either party to the pension consulting agreement may terminate the agreement upon written notice to the other party in accordance with the terms of the agreement for services. The pension consulting fees will be prorated for the quarter in which the termination notice is given and any unearned fees will

be refunded to the client.

401k Investment Management Services

We extend our portfolio management services to businesses via 401k plans. The size and structure of a company's 401k plan could result in a negotiated rate.

Types of Investments

We primarily offer advice on equity securities, mutual funds and exchange traded funds. We also offer advice on private placements. Additionally, we may advise you on other various types of investments based on your stated goals and objectives. We may also provide advice on any type of investment held in your portfolio at the inception of our advisory relationship. Refer to the Methods of Analysis, Investment Strategies and Risk of Loss below for additional disclosures on this topic.

Assets Under Management

As of December 31, 2025, we have \$141,942,888 in discretionary assets under management and \$937,000 in non-discretionary assets under management. We also have \$5,271,126 in assets under advisement.

Item 5 Fees and Compensation

Portfolio Management Services

Our fee for portfolio management services is based on a percentage of the assets in your account. Our annual portfolio management fee is billed and payable quarterly, in arrears, based on the average daily balance. Assets in each of your account(s) are included in the fee assessment unless specifically identified in writing for exclusion.

Advisory Fees are 2.00% and may be modified depending upon the size of the portfolio, complexity of services required or individual circumstances, and at the discretion of the Firm. No increase in the annual fee or other changes to the agreement shall be effective without thirty days prior written notification.

If the portfolio management agreement is executed at any time other than the first day of a calendar quarter, our fees will apply on a pro rata basis, which means that the advisory fee is payable in proportion to the number of days in the quarter for which you are a client. Our advisory fee is negotiable, depending on individual client circumstances.

At our discretion, we may combine the account values of family members living in the same household to determine the applicable advisory fee. For example, we may combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts.

We will deduct our fee directly from your account through the qualified custodian holding your funds and securities. We will deduct our advisory fee only when the following requirements are met:

- You provide our firm with written authorization permitting the fees to be paid directly from your account held by the qualified custodian.
- We send you an invoice showing the amount of the fee, the value of the assets on which the fee is based, the time period covered by the fee, and the specific manner in which the fee was calculated.
- The qualified custodian agrees to send you a statement, at least quarterly, indicating all amounts disbursed from your account including the amount of the advisory fee paid directly to

our firm.

We encourage you to reconcile our invoices with the statement(s) you receive from the qualified custodian. If you find any inconsistent information between our invoice and the statement(s) you receive from the qualified custodian, call our main office number located on the cover page of this brochure.

You may terminate the portfolio management agreement upon 30 days written notice to our firm. You will incur a pro rata charge for services rendered prior to the termination of the portfolio management agreement, which means you will incur advisory fees only in proportion to the number of days in the quarter for which you are a client.

Financial Planning Services

We charge either an hourly fee or a fixed fee for financial planning services. Our hourly fee is \$200 per hour and our fixed fee ranges from \$1,500 - \$2,500. The fees are negotiable depending upon the complexity and scope of the plan, your financial situation, and your financial objectives. For hourly arrangements, an estimate of the total time/cost will be determined at the start of the advisory relationship. In limited circumstances, the cost/time could potentially exceed the initial estimate. In such cases, we will notify you and request that you approve the additional fee. Fees are due upon completion of the services rendered. At our discretion, we may offset our financial planning fees to the extent you implement the financial plan through our Portfolio Management Service.

You may terminate the financial planning services agreement upon 30 days written notice to our firm. Since fees are payable in arrears, you will be responsible for a prorated fee based on services performed.

Financial Consulting Services

We charge either an hourly fee or a fixed fee for financial consulting services, which is negotiable depending on the scope and complexity of the plan, your situation, and your financial objectives. Our hourly fee is \$200 per hour and our fixed fee ranges from \$1,500 - \$2500. An estimate of the total time/cost will be determined at the start of the advisory relationship. In limited circumstances, the cost/time could potentially exceed the initial estimate. In such cases, we will notify you and request that you approve the additional fee. Fees are due upon completion of the services rendered.

You may terminate the advisory consulting services agreement upon 30 days written notice to our firm. Since fees are payable in arrears, you will be responsible for a prorated fee based on services performed.

Pension Consulting Services

We charge either an hourly fee or a fixed fee for our customized pension consulting services and will be negotiated with the plan sponsor or named fiduciary on a case-by-case basis. Our Financial Consulting Agreement encompasses Pension Consulting Services. Our hourly fee is \$200 per hour and our fixed fee ranges from \$1,500 - \$2,500.

You may terminate the pension consulting services agreement upon 30 days written notice to our firm. You will incur a pro rata charge for services rendered prior to the termination of the agreement, which means you will incur advisory fees only in proportion to the number of days in the quarter for which you are a client. If you have pre-paid advisory fees that we have not yet earned, you will receive a prorated refund of those fees.

Additional Fees and Expenses

As part of our investment advisory services to you, we may invest, or recommend that you invest, in

mutual funds and exchange traded funds. The fees that you pay to our firm for investment advisory services are separate and distinct from the fees and expenses charged by mutual funds or exchange traded funds (described in each fund's prospectus) to their shareholders. These fees will generally include a management fee and other fund expenses and typically range from 0% to 2%. You will also incur transaction charges and/or brokerage fees when purchasing or selling securities. These charges and fees are typically imposed by the broker-dealer or custodian through whom your account transactions are executed. We do not share in any portion of the brokerage fees/transaction charges imposed by the broker-dealer or custodian. To fully understand the total cost you will incur, you should review all the fees charged by mutual funds, exchange traded funds, our firm, and others. For information on our brokerage practices, refer to the Brokerage Practices section of this brochure.

Compensation for the Sale of Securities or Other Investment Products

Persons providing investment advice on behalf of our firm are licensed as insurance agents. These persons may earn commission-based compensation for selling insurance products, including insurance products they sell to you. Insurance commissions earned by these persons are separate from our advisory fees. They may also sell you fee-based insurance products that do not generate commissions but will be included in the asset under management calculation. A conflict of interest could arise when the person providing investment advice on behalf of our firm who are insurance agents sell you an insurance product that generates commissions and is not solely a fee-based product. You are under no obligation, contractually or otherwise, to purchase insurance products through any person affiliated with our firm.

You have the option to purchase investment products that are recommended by the firm through other brokers or agents that are not affiliated with the firm.

IRA Rollover Considerations

As part of our investment advisory services to you, we may recommend that you withdraw the assets from your employer's retirement plan and roll the assets over to an individual retirement account ("IRA") that we will manage on your behalf. If you elect to roll the assets to an IRA that is subject to our management, we will charge you an asset-based fee as set forth in the agreement you executed with our firm. This practice presents a conflict of interest because persons providing investment advice on our behalf have an incentive to recommend a rollover to you for the purpose of generating fee-based compensation rather than solely based on your needs. You are under no obligation, contractually or otherwise, to complete the rollover. Moreover, if you do complete the rollover, you are under no obligation to have the assets in an IRA managed by our firm.

Many employers permit former employees to keep their retirement assets in their company plan. Also, current employees can sometimes move assets out of their company plan before they retire or change jobs. In determining whether to complete the rollover to an IRA, and to the extent the following options are available, you should consider the costs and benefits of:

1. Leaving the funds in your employer's (former employer's) plan.
2. Moving the funds to a new employer's retirement plan.
3. Cashing out and taking a taxable distribution from the plan.
4. Rolling the funds into an IRA rollover account.

Each of these options has advantages and disadvantages and before making a change we encourage you to speak with your CPA and/or tax attorney.

If you are considering rolling over your retirement funds to an IRA for us to manage here are a few points to consider before you do so:

1. Determine whether the investment options in your employer's retirement plan address your needs or whether you might want to consider other types of investments.
 - a. Employer retirement plans generally have a more limited investment menu than IRAs.
 - b. Employer retirement plans may have unique investment options not available to the public such as employer securities, or previously closed funds.
2. Your current plan may have lower fees than our fees.
 - a. If you are interested in investing only in mutual funds, you should understand the cost structure of the share classes available in your employer's retirement plan and how the costs of those share classes compare with those available in an IRA.
 - b. You should understand the various products and services you might take advantage of at an IRA provider and the potential costs of those products and services.
3. Our strategy may have higher risk than the option(s) provided to you in your plan.
4. Your current plan may also offer financial advice.
5. If you keep your assets titled in a 401k or retirement account, you could potentially delay your required minimum distribution beyond age 70.5.
6. Your 401k may offer more liability protection than a rollover IRA; each state may vary.
 - a. Generally, federal law protects assets in qualified plans from creditors. Since 2005, IRA assets have been generally protected from creditors in bankruptcies. However, there can be some exceptions to the general rules so you should consult with an attorney if you are concerned about protecting your retirement plan assets from creditors.
7. You may be able to take out a loan on your 401k, but not from an IRA.
8. IRA assets can be accessed any time; however, distributions are subject to ordinary income tax and may also be subject to a 10% early distribution penalty unless they qualify for an exception such as disability, higher education expenses or the purchase of a home.
9. If you own company stock in your plan, you may be able to liquidate those shares at a lower capital gains tax rate.
10. Your plan may allow you to hire us as the manager and keep the assets titled in the plan name.

It is important that you understand the differences between these types of accounts and to decide whether a rollover is best for you. Prior to proceeding, if you have questions contact your investment adviser representative, or call our main number as listed on the cover page of this brochure.

Item 6 Performance-Based Fees and Side-By-Side Management

The firm does not charge performance-based fees.

Item 7 Types of Clients

We offer investment advisory services to individuals, including high net worth individuals, pension and profit-sharing plans, defined benefit plans, 401Ks, cash balance plans, charitable organizations, corporations or other business entities not listed above, state or municipal government entities, other investment advisers and insurance companies.

In general, we do not require a minimum dollar amount to open and maintain an advisory account; however, we have the right to terminate your account if it falls below a minimum size which, in our sole opinion, is too small to manage effectively.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

Our Methods of Analysis and Investment Strategies

We may use one or more of the following methods of analysis or investment strategies when providing

investment advice to you:

Charting Analysis - involves the gathering and processing of price and volume pattern information for a particular security, sector, broad index or commodity. This price and volume pattern information is analyzed. The resulting pattern and correlation data is used to detect departures from expected performance and diversification and predict future price movements and trends.

Risk: Our charting analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Technical Analysis - involves studying past price patterns, trends and interrelationships in the financial markets to assess risk-adjusted performance and predict the direction of both the overall market and specific securities.

Risk: The risk of market timing based on technical analysis is that our analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Fundamental Analysis - involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience and expertise of the company's management, and the outlook for the company and its industry. The resulting data is used to measure the true value of the company's stock compared to the current market value.

Risk: The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Cyclical Analysis - a type of technical analysis that involves evaluating recurring price patterns and trends. Economic/business cycles may not be predictable and may have many fluctuations between long-term expansions and contractions.

Risk: The lengths of economic cycles may be difficult to predict with accuracy and therefore the risk of cyclical analysis is the difficulty in predicting economic trends and consequently the changing value of securities that would be affected by these changing trends.

Modern Portfolio Theory - a theory of investment which attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, by carefully diversifying the proportions of various assets.

Risk: Market risk is that part of a security's risk that is common to all securities of the same general class (stocks and bonds) and thus cannot be eliminated by diversification.

Long-Term Purchases - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

Risk: Using a long-term purchase strategy generally assumes the financial markets will go up in the long-term which may not be the case. There is also the risk that the segment of the market that you are invested in or perhaps just your particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

Short-Term Purchases - securities purchased with the expectation that they will be sold within a relatively short period of time, generally less than one year, to take advantage of the securities' short-term price fluctuations.

Risk: Using a short-term purchase strategy generally assumes that we can predict how financial markets will perform in the short-term which may be very difficult and will incur a disproportionately higher amount of transaction costs compared to long-term trading. There are many factors that can affect financial market performance in the short-term (such as short-term interest rate changes, cyclical earnings announcements, etc.) but may have a smaller impact over longer periods of times.

Short Sales - Unlike a straightforward investment in stocks where you buy shares with the expectation that their price will increase so you can sell at a profit, in a "short sale" you borrow stocks from your brokerage firm and sell them immediately, hoping to buy them later at a lower price. Thus, a short seller hopes that the price of a stock will go down in the near future. A short seller thus uses declines in the market to his advantage. The short seller makes money when the stock prices fall and loses when prices go up. The SEC has strict regulations in place regarding short selling.

Risk: Short selling is very risky. A short seller will profit if the stock goes down in price, but if the price of the shares increase, the potential losses are unlimited. There is no ceiling on how much a short seller can lose in a trade. The share price may keep going up and the short seller will have to pay whatever the prevailing stock price is to buy back the shares. However, gains have a ceiling level because the stock price cannot fall below zero. A short seller has to undertake to pay the earnings on the borrowed securities as long as the short seller chooses to keep the short position open. If the company declares huge dividends or issues bonus shares, the short seller will have to pay that amount to the lender. Any such occurrence can skew the entire short investment and make it unprofitable. The broker can use the funds in the short seller's margin account to buy back the loaned shares or issue a "call away" to get the short seller to return the borrowed securities. If the broker makes this call when the stock price is much higher than the price at the time of the short sale, then the investor can end up taking huge losses.

Margin Transactions - a securities transaction in which an investor borrows money to purchase a security, in which case the security serves as collateral on the loan.

Risk: If the value of the shares drops sufficiently, the investor will be required to either deposit more cash into the account or sell a portion of the stock in order to maintain the margin requirements of the account. This is known as a "margin call." An investor's overall risk includes the amount of money invested plus the amount that was loaned to them.

Option Writing - a securities transaction that involves selling an option. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell a particular security at a specified price on or before the expiration date of the option. When an investor sells an option, he or she must deliver to the buyer a specified number of shares if the buyer exercises the option. The option writer/seller receives a premium (the market price of the option at a particular time) in exchange for writing the

option.

Risk: Options are complex investments and can be very risky, especially if the investor does not own the underlying stock. In certain situations, an investor's risk can be unlimited.

Trading - We may use frequent trading (in general, selling securities within 30 days of purchasing the same securities) as an investment strategy when managing your account(s). Frequent trading is not a fundamental part of our overall investment strategy, but we may use this strategy occasionally when we determine that it is suitable given your stated investment objectives and tolerance for risk. This may include buying and selling securities frequently in an effort to capture significant market gains and avoid significant losses.

Risk: When a frequent trading policy is in effect, there is a risk that investment performance within your account may be negatively affected, particularly through increased brokerage and other transactional costs and taxes.

Our investment strategies and advice may vary depending upon each client's specific financial situation. As such, we determine investments and allocations based upon your predefined objectives, risk tolerance, time horizon, financial information, liquidity needs and other various suitability factors. Your restrictions and guidelines may affect the composition of your portfolio. **It is important that you notify us immediately with respect to any material changes to your financial circumstances, including for example, a change in your current or expected income level, tax circumstances, or employment status.**

Tax Considerations

Our strategies and investments may have unique and significant tax implications. However, unless we specifically agree otherwise, and in writing, tax efficiency is not our primary consideration in the management of your assets. Regardless of your account size or any other factors, we strongly recommend that you consult with a tax professional regarding the investing of your assets.

Moreover, custodians and broker-dealers must report the cost basis of equities acquired in client accounts on or after January 1, 2011. Your custodian will default to the First-In First-Out ("FIFO") accounting method for calculating the cost basis of your investments. You are responsible for contacting your tax advisor to determine if this accounting method is the right choice for you. If your tax advisor believes another accounting method is more advantageous, provide written notice to our firm immediately and we will alert your account custodian of your individually selected accounting method. Decisions about cost basis accounting methods will need to be made before trades settle, as the cost basis method cannot be changed after settlement.

Risk of Loss

Investing in securities involves risk of loss that you should be prepared to bear. We do not represent or guarantee that our services or methods of analysis can or will predict future results, successfully identify market tops or bottoms, or insulate clients from losses due to market corrections or declines. We cannot offer any guarantees or promises that your financial goals and objectives will be met. Past performance is in no way an indication of future performance.

Recommendation of Particular Types of Securities

We primarily recommend equity securities, mutual funds, and exchange traded funds. However, we may advise on other types of investments as appropriate for you since each client has different needs and different tolerance for risk. Each type of security has its own unique set of risks associated with it and it would not be possible to list here all of the specific risks of every type of investment. Even within the same type of investment, risks can vary widely. However, in very general terms, the higher the

anticipated return of an investment, the higher the risk of loss associated with the investment.

Stocks: There are numerous ways of measuring the risk of equity securities (also known simply as "equities" or "stock"). In very broad terms, the value of a stock depends on the financial health of the company issuing it. However, stock prices can be affected by many other factors including but not limited to the class of stock (for example, preferred or common); the health of the market sector of the issuing company; and the overall health of the economy. In general, larger, better-established companies ("large cap") tend to be safer than smaller start-up companies ("small cap") are but the mere size of an issuer is not, by itself, an indicator of the safety of the investment.

Mutual Funds and Exchange Traded Funds: Mutual funds and exchange traded funds ("ETF") are professionally managed collective investment systems that pool money from many investors and invest in stocks, bonds, short-term money market instruments, other mutual funds, other securities, or any combination thereof. The fund will have a manager that trades the fund's investments in accordance with the fund's investment objective. While mutual funds and ETFs generally provide diversification, risks can be significantly increased if the fund is concentrated in a particular sector of the market, primarily invests in small cap or speculative companies, uses leverage (i.e., borrows money) to a significant degree, or concentrates in a particular type of security (i.e., equities) rather than balancing the fund with different types of securities. ETFs differ from mutual funds since they can be bought and sold throughout the day like stock and their price can fluctuate throughout the day. The returns on mutual funds and ETFs can be reduced by the costs to manage the funds. Also, while some mutual funds are "no load" and charge no fee to buy into, or sell out of, the fund, other types of mutual funds do charge such fees which can also reduce returns. Mutual funds can also be "closed end" or "open end". So-called "open end" mutual funds continue to allow in new investors indefinitely whereas "closed end" funds have a fixed number of shares to sell which can limit their availability to new investors.

Money Market Funds: A money market fund is technically a security. The fund managers attempt to keep the share price constant at \$1/share. However, there is no guarantee that the share price will stay at \$1/share. If the share price goes down, you can lose some, or all, of your principal. The U.S. Securities and Exchange Commission ("SEC") notes that "While investor losses in money market funds have been rare, they are possible." In return for this risk, you should earn a greater return on your cash than you would expect from a Federal Deposit Insurance Corporation ("FDIC") insured savings account (money market funds are not FDIC insured). Next, money market fund rates are variable. In other words, you do not know how much you will earn on your investment next month. The rate could go up or go down. If it goes up, that may result in a positive outcome. However, if it goes down and you earn less than you expected to earn, you may end up needing more cash. A final risk you are taking with money market funds has to do with inflation. Because money market funds are considered to be safer than other investments like stocks, long-term average returns on money market funds tends to be less than long term average returns on riskier investments. Over long periods of time, inflation can eat away at your returns.

Certificates of Deposit: Certificates of deposit are generally the safest type of investment since they are insured by the federal government up to a certain amount. However, because the returns are generally very low, it is possible for inflation to outpace the return. Likewise, U.S. government securities are backed by the full faith and credit of the U.S. government, but it is also possible for the rate of inflation to exceed the returns.

Municipal Securities: Municipal securities, while generally thought of as safe, can have significant risks associated with them including, but not limited to: the credit worthiness of the governmental entity that issues the bond; the stability of the revenue stream that is used to pay the interest to the bondholders; when the bond is due to mature; and, whether or not the bond can be "called" prior to

maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same amount of interest or yield to maturity.

Bonds: Corporate debt securities (or "bonds") are typically safer investments than equity securities, but their risk can also vary widely based on: the financial health of the issuer; the risk that the issuer might default; when the bond is set to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same rate of return.

Commercial Paper: Commercial paper ("CP") is, in most cases, an unsecured promissory note that is issued with a maturity of 270 days or less. Being unsecured the risk to the investor is that the issuer may default. There is a less risk in asset based commercial paper (ABCP). The difference between ABCP and CP is that instead of being an unsecured promissory note representing an obligation of the issuing company, ABCP is backed by securities. Therefore, the perceived quality of the ABCP depends on the underlying securities.

Real Estate: Real estate is increasingly being used as part of a long-term core strategy due to increased market efficiency and increasing concerns about the future long-term variability of stock and bond returns. In fact, real estate is known for its ability to serve as a portfolio diversifier and inflation hedge. However, the asset class still bears a considerable amount of market risk. Real estate has shown itself to be very cyclical, somewhat mirroring the ups and downs of the overall economy. In addition to employment and demographic changes, real estate is also influenced by changes in interest rates and the credit markets, which affect the demand and supply of capital and thus real estate values. Along with changes in market fundamentals, investors wishing to add real estate as part of their core investment portfolios need to look for property concentrations by area or by property type. Because property returns are directly affected by local market basics, real estate portfolios that are too heavily concentrated in one area or property type can lose their risk mitigation attributes and bear additional risk by being too influenced by local or sector market changes.

Real Estate Investment Trust: A real estate investment trust ("REIT") is a corporate entity which invests in real estate and/or engages in real estate financing. A REIT reduces or eliminates corporate income taxes. REITs can be publicly or privately held. Public REITs may be listed on public stock exchanges. REITs are required to declare 90% of their taxable income as dividends, but they actually pay dividends out of funds from operations, so cash flow has to be strong or the REIT must either dip into reserves, borrow to pay dividends, or distribute them in stock (which causes dilution). After 2012, the IRS stopped permitting stock dividends. Most REITs must refinance or erase large balloon debts periodically. The credit markets are no longer frozen, but banks are demanding, and getting, harsher terms to re-extend REIT debt. Some REITs may be forced to make secondary stock offerings to repay debt, which will lead to additional dilution of the stockholders. Fluctuations in the real estate market can affect the REIT's value and dividends.

Limited Partnerships: A limited partnership is a financial affiliation that includes at least one general partner and a number of limited partners. The partnership invests in a venture, such as real estate development or oil exploration, for financial gain. The general partner does not usually invest any capital, but has management authority and unlimited liability. That is, the general partner runs the business and, in the event of bankruptcy, is responsible for all debts not paid or discharged. The limited partners have no management authority and confine their participation to their capital investment. That is, limited partners invest a certain amount of money and have nothing else to do with the business. However, their liability is limited to the amount of the investment. In the worst-case scenario for a limited partner, he/she loses what he/she invested. Profits are divided between general and limited partners according to an arrangement formed at the creation of the partnership.

Warrants: A warrant is a derivative (security that derives its price from one or more underlying assets) that confers the right, but not the obligation, to buy or sell a security – normally an equity – at a certain price before expiration. The price at which the underlying security can be bought or sold is referred to as the exercise price or strike price. Warrants that confer the right to buy a security are known as call warrants; those that confer the right to sell are known as put warrants. Warrants are in many ways similar to options. The main difference between warrants and options is that warrants are issued and guaranteed by the issuing company, whereas options are traded on an exchange and are not issued by the company. Also, the lifetime of a warrant is often measured in years, while the lifetime of a typical option is measured in months. Warrants do not pay dividends or come with voting rights.

Options Contracts: Options are complex securities that involve risks and are not suitable for everyone. Option trading can be speculative in nature and carry substantial risk of loss. It is generally recommended that you only invest in options with risk capital. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell an underlying asset at a specific price on or before a certain date (the "expiration date"). The two types of options are calls and puts:

A call gives the holder the right to buy an asset at a certain price within a specific period of time. Calls are similar to having a long position on a stock. Buyers of calls hope that the stock will increase substantially before the option expires.

A put gives the holder the right to sell an asset at a certain price within a specific period of time. Puts are very similar to having a short position on a stock. Buyers of puts hope that the price of the stock will fall before the option expires.

Selling options is more complicated and can be even riskier.

The option trading risks pertaining to options buyers are:

- Risk of losing your entire investment in a relatively short period of time.
- The risk of losing your entire investment increases if, as expiration nears, the stock is below the strike price of the call (for a call option) or if the stock is higher than the strike price of the put (for a put option).
- European style options which do not have secondary markets on which to sell the options prior to expiration can only realize its value upon expiration.
- Specific exercise provisions of a specific option contract may create risks.
- Regulatory agencies may impose exercise restrictions, which stops you from realizing value.

The option trading risks pertaining to options sellers are:

- Options sold may be exercised at any time before expiration.
- Covered Call traders forgo the right to profit when the underlying stock rises above the strike price of the call options sold and continues to risk a loss due to a decline in the underlying stock.
- Writers of Naked Calls risk unlimited losses if the underlying stock rises.
- Writers of Naked Puts risk unlimited losses if the underlying stock drops.
- Writers of naked positions run margin risks if the position goes into significant losses. Such risks may include liquidation by the broker.
- Writers of call options could lose more money than a short seller of that stock could on the same rise on that underlying stock. This is an example of how the leverage in options can work against the option trader.
- Writers of Naked Calls are obligated to deliver shares of the underlying stock if those call

options are exercised.

- Call options can be exercised outside of market hours such that effective remedy actions cannot be performed by the writer of those options.
- Writers of stock options are obligated under the options that they sold even if a trading market is not available or that they are unable to perform a closing transaction.
- The value of the underlying stock may surge or ditch unexpectedly, leading to automatic exercises.

Other option trading risks are:

- The complexity of some option strategies is a significant risk on its own.
- Option trading exchanges or markets and option contracts themselves are open to changes at all times.
- Options markets have the right to halt the trading of any options, thus preventing investors from realizing value.
- Risk of erroneous reporting of exercise value.
- If an options brokerage firm goes insolvent, investors trading through that firm may be affected.
- Internationally traded options have special risks due to timing across borders.

Risks that are not specific to options trading include market risk, sector risk and individual stock risk. Option trading risks are closely related to stock risks, as stock options are a derivative of stocks.

Structured Products: A structured product, also known as a market-linked product, is generally a pre-packaged investment strategy based on derivatives, such as a single security, a basket of securities, options, indices, commodities, debt issuances, and/or foreign currencies, and to a lesser extent, swaps. Structured products are usually issued by investment banks or affiliates thereof. They have a fixed maturity and have two components: a note and a derivative. The derivative component is often an option. The note provides for periodic interest payments to the investor at a predetermined rate, and the derivative component provides for the payment at maturity. Some products use the derivative component as a put option written by the investor that gives the buyer of the put option the right to sell to the investor the security or securities at a predetermined price. Other products use the derivative component to provide for a call option written by the investor that gives the buyer of the call option the right to buy the security or securities from the investor at a predetermined price. A feature of some structured products is a "principal guarantee" function, which offers protection of principal if held to maturity. However, these products are not always Federal Deposit Insurance Corporation insured; they may only be insured by the issuer, and thus have the potential for loss of principal in the case of a liquidity crisis, or other solvency problems with the issuing company. Investing in structured products involves a number of risks including but not limited to: fluctuations in the price, level or yield of underlying instruments, interest rates, currency values and credit quality; substantial loss of principal; limits on participation in any appreciation of the underlying instrument; limited liquidity; credit risk of the issuer; conflicts of interest; and, other events that are difficult to predict.

Item 9 Disciplinary Information

We are required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of our advisory business or the integrity of our management. We do not have any required disclosures under this item.

Item 10 Other Financial Industry Activities and Affiliations

Licensed Insurance Agency

Our firm is also licensed as an insurance agency. Therefore, persons providing investment advice on behalf of our firm may be licensed as insurance agents. These persons may earn commission-based compensation for selling insurance products, including insurance products they sell to you. Insurance commissions earned by these persons are separate from our advisory fees. They may also sell you fee-based insurance products that do not generate commissions but will be included in the asset under management calculation. A conflict of interest could arise when the person providing investment advice on behalf of our firm who are insurance agents sell you an insurance product that generates commissions and is not solely a fee-based product. You are under no obligation, contractually or otherwise, to purchase insurance products through any person affiliated with our firm.

Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Description of Our Code of Ethics

We strive to comply with applicable laws and regulations governing our practices. Therefore, our Code of Ethics includes guidelines for professional standards of conduct for persons associated with our firm. Our goal is to protect your interests at all times and to demonstrate our commitment to our fiduciary duties of honesty, good faith, and fair dealing with you. All persons associated with our firm are expected to adhere strictly to these guidelines. Persons associated with our firm are also required to report any violations of our Code of Ethics. Additionally, we maintain and enforce written policies reasonably designed to prevent the misuse or dissemination of material, non-public information about you or your account holdings by persons associated with our firm.

Clients or prospective clients may obtain a copy of our Code of Ethics by contacting us at the telephone number on the cover page of this brochure.

Participation or Interest in Client Transactions

Neither our firm nor any persons associated with our firm has any material financial interest in client transactions beyond the provision of investment advisory services as disclosed in this brochure.

Personal Trading Practices

Our firm or persons associated with our firm may buy or sell the same securities that we recommend to you or securities in which you are already invested. A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To mitigate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

Block Trading

Our firm or persons associated with our firm may buy or sell securities for you at the same time we or persons associated with our firm buy or sell such securities for our own account. We may also combine our orders to purchase securities with your orders to purchase securities ("block trading"). Refer to the Brokerage Practices section in this brochure for information on our block trading practices.

A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To mitigate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

Item 12 Brokerage Practices

We recommend the brokerage and custodial services of Schwab Advisor Services, a division of

Charles Schwab & Co., Inc. ("Custodian") a securities broker-dealer and a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation. We believe that the Schwab provides quality execution services for you at competitive prices. Price is not the sole factor we consider in evaluating best execution. We also consider the quality of the brokerage services provided by the Custodian, including the value of the Custodian's reputation, execution capabilities, commission rates, and responsiveness to our clients and our firm. In recognition of the value of the services the Custodian provides, you may pay higher commissions and/or trading costs than those that may be available elsewhere.

Note – Some of our clients maintain their accounts with TIAA-CREF. TIAA-CREF provides recordkeeping and related services to employer-sponsored retirement plans and offers individual life insurance and annuity products. With written authorization from the client, TIAA-CREF allows advisors to view client accumulations and account history, to process transactions and to create life insurance, annuity income and minimum distribution illustrations via TIAA-CREF secure website. The availability of these services will depend on the level of authorization granted to the advisor by its client. Thus, the firm's relationship to TIAA-CREF is dictated by the client's relationship to TIAA-CREF.

Schwab Advisor Services

We participate in the institutional advisor program (the "Program") offered by Schwab Advisor Services. Schwab Advisor Services is a division of Charles Schwab & Co., Inc., member FINRA/SIPC ("Schwab"), an unaffiliated SEC-registered broker-dealer and FINRA member. Schwab offers to independent investment advisors services which include custody of securities, trade execution, clearance and settlement of transactions. We receive some benefits from Schwab through our participation in the Program.

As disclosed above, we participate in Schwab's institutional customer program, and we may recommend Schwab to you for custody and brokerage services. There is no direct link between our participation in the Program and the investment advice we give you, although we receive economic benefits through our participation in the Program that are typically not available to Schwab retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate Client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving our participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to your accounts); the ability to have advisory fees deducted directly from your accounts; access to an electronic communications network for order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to us by third party vendors. Schwab may also have paid for business consulting and professional services received by our related persons. Some of the products and services made available by Schwab through the Program may benefit us but may not benefit your accounts. These products or services may assist us in managing and administering your accounts, including accounts not maintained at Schwab. Other services made available by Schwab are intended to help us manage and further develop our business enterprise. The benefits received by us or our personnel through participation in the Program do not depend on the amount of brokerage transactions directed to Schwab. As part of our fiduciary duties to you, we endeavor at all times to put your interests first. You should be aware, however, that the receipt of economic benefits by us or our related persons in and of itself creates a potential conflict of interest and may indirectly influence our choice of Schwab for custody and brokerage services.

Brokerage for Client Referrals

We do not receive client referrals from broker-dealers in exchange for cash or other compensation, such as brokerage services or research.

Directed Brokerage

In limited circumstances, and at our discretion, some clients may instruct our firm to use one or more particular brokers for the transactions in their accounts. If you choose to direct our firm to use a particular broker, you should understand that this might prevent our firm from aggregating trades with other client accounts or from effectively negotiating brokerage commissions on your behalf. This practice may also prevent our firm from obtaining favorable net price and execution. Thus, when directing brokerage business, you should consider whether the commission expenses, execution, clearance, and settlement capabilities that you will obtain through your broker are adequately favorable in comparison to those that we would otherwise obtain for you.

Block Trades

We combine multiple orders for shares of the same securities purchased for discretionary advisory accounts we manage (this practice is commonly referred to as "block trading"). We will then distribute a portion of the shares to participating accounts in a fair and equitable manner. Generally, clients will pay a fixed transaction cost regardless of the number of shares transacted. In certain cases, each participating account pays an average price per share for all transactions and pays a proportionate share of all transaction costs on any given day. In the event an order is only partially filled, the shares will be allocated to participating accounts in a fair and equitable manner, typically in proportion to the size of each client's order. Accounts owned by our firm or persons associated with our firm may participate in block trading with your accounts; however, they will not be given preferential treatment.

We do not block trade for non-discretionary accounts. Accordingly, non-discretionary accounts may pay different costs than discretionary accounts pay. If you enter into non-discretionary arrangements with our firm, we may not be able to buy and sell the same quantities of securities for you and you may pay higher commissions, fees, and/or transaction costs than clients who enter into discretionary arrangements with our firm.

Item 13 Review of Accounts

Portfolio Management Reviews

Beau Wiltz and Alex Hebert, Member Managers, and investment adviser representatives of Stone Wealth Partners LLC, will monitor your accounts on an ongoing basis and will conduct account reviews at least annually, to ensure the advisory services provided to you are consistent with your investment needs and objectives. Additional reviews may be conducted based on various circumstances, including, but not limited to:

- contributions and withdrawals,
- year-end tax planning,
- market moving events,
- security specific events, and/or
- changes in your risk/return objectives.

The individuals conducting reviews may vary from time to time, as personnel join or leave our firm.

We will not provide you with additional or regular written reports. You will receive trade confirmations and monthly or quarterly statements from your account custodian(s).

Financial Planning Reviews

Beau Wiltz and Alex Hebert, Member Managers, and investment adviser representatives of Stone Wealth Partners LLC, will review financial plans as needed, depending on the arrangements made with

you at the inception of your advisory relationship to ensure that the planning advice made to you is consistent with your stated investment needs and objectives. Generally, we will contact you periodically to determine whether any updates may be needed based on changes in your circumstances. Changed circumstances may include, but are not limited to, marriage, divorce, birth, death, inheritance, lawsuit, retirement, job loss, and/or disability, among others. Where warranted, we will provide you with updates to the financial plan in conjunction with the review. We recommend meeting with you at least annually to review and update your plan if needed. Additional reviews will be conducted upon your request. Such reviews and updates may be subject to our then current hourly rate. We will not provide regular written reports for financial planning and consulting services. If you implement financial planning advice through Stone Wealth Partners LLC, you will receive trade confirmations and quarterly statements from relevant custodians.

Item 14 Client Referrals and Other Compensation

As disclosed under the Fees and Compensation section in this brochure, persons providing investment advice on behalf of our firm are licensed insurance agents. For information on the conflicts of interest this presents, and how we address these conflicts, refer to the Fees and Compensation section.

We do not receive any compensation from any third party in connection with providing investment advice to you. We have entered into a referral agreement with a solicitor for client referrals. For any clients referred by the Firm, we will share with them a percentage of the advisory fees on the referred clients' accounts. Your fees will not increase due to this arrangement.

Refer to the Brokerage Practices section above for disclosures on research and other benefits we may receive resulting from our relationship with your account custodian.

Item 15 Custody

As paying agent for our firm, your independent custodian will directly debit your account(s) for the payment of our advisory fees. This ability to deduct our advisory fees from your accounts causes our firm to exercise limited custody over your funds or securities. We do not have physical custody of any of your funds and/or securities. Your funds and securities will be held with a bank, broker-dealer, or other qualified custodian. You will receive account statements from the qualified custodian(s) holding your funds and securities at least quarterly. The account statements from your custodian(s) will indicate the amount of our advisory fees deducted from your account(s) each billing period. You should carefully review account statements for accuracy. If you have a question regarding your account statement, or if you did not receive a statement from your custodian, contact us immediately at the telephone number on the cover page of this brochure.

Item 16 Investment Discretion

Before we can buy or sell securities on your behalf using discretion, you must first sign our discretionary management agreement and the appropriate trading authorization forms.

You may grant our firm discretion over the selection and amount of securities to be purchased or sold for your account(s) without obtaining your consent or approval prior to each transaction. You may specify investment objectives, guidelines, and/or impose certain conditions or investment parameters for your account(s). For example, you may specify that the investment in any particular stock or industry should not exceed specified percentages of the value of the portfolio and/or restrictions or prohibitions of transactions in the securities of a specific industry or security. Refer to the Advisory

Business section in this brochure for more information on our discretionary management services.

If you enter into a non-discretionary arrangement with our firm, we will obtain your approval prior to the execution of any transactions for your account(s). You have an unrestricted right to decline to implement any advice provided by our firm on a non-discretionary basis.

Item 17 Voting Client Securities

We will not vote proxies on behalf of your advisory accounts. At your request, we may offer you advice regarding corporate actions and the exercise of your proxy voting rights. If you own shares of applicable securities, you are responsible for exercising your right to vote as a shareholder.

In most cases, you will receive proxy materials directly from the account custodian. However, in the event we were to receive any written or electronic proxy materials, we would forward them directly to you by mail, unless you have authorized our firm to contact you by electronic mail, in which case, we would forward any electronic solicitations to vote proxies.

Item 18 Financial Information

Our firm does not have any financial condition or impairment that would prevent us from meeting our contractual commitments to you. We do not take physical custody of client funds or securities, or serve as trustee or signatory for client accounts, and we do not require the prepayment of more than \$1200 in fees six or more months in advance. Therefore, we are not required to include a financial statement with this brochure.

We have not filed a bankruptcy petition at any time in the past ten years.

Additional Information

Your Privacy

We view protecting your private information as a top priority. Pursuant to applicable privacy requirements, we have instituted policies and procedures to ensure that we keep your personal information private and secure.

We do not disclose any non-public personal information about you to any non-affiliated third parties, except as permitted by law. In the course of servicing your account, we may share some information with our service providers, such as transfer agents, custodians, broker-dealers, accountants, consultants, and attorneys.

We restrict internal access to non-public personal information about you to employees, who need that information in order to provide products or services to you. We maintain physical and procedural safeguards that comply with regulatory standards to guard your non-public personal information and to ensure our integrity and confidentiality. We will not sell information about you or your accounts to anyone. We do not share your information unless it is required to process a transaction, at your request, or required by law.

You will receive a copy of our privacy notice prior to or at the time you sign an advisory agreement with our firm. Thereafter, we will deliver a copy of the current privacy policy notice to you on an annual basis. Contact our main office at the telephone number on the cover page of this brochure if you have any questions regarding this policy.

If you decide to close your account(s) we will adhere to our privacy policies, which may be amended from time to time.

If we make any substantive changes in our privacy policy that would further permit or require disclosures of your private information, we will provide written notice to you. Where the change is based on permitted disclosures, you will be given an opportunity to direct us as to whether such disclosure is acceptable. Where the change is based on required disclosures, you will only receive written notice of the change. You may not opt out of the required disclosures.

If you have questions about our privacy policies, contact our main office at the telephone number on the cover page of this brochure and ask to speak to the Chief Compliance Officer.

Trade Errors

In the event a trading error occurs in your account, our policy is to restore your account to the position it should have been in had the trading error not occurred. Depending on the circumstances, corrective actions may include canceling the trade, adjusting an allocation, and/or reimbursing the account.

Class Action Lawsuits

We do not determine if securities held by you are the subject of a class action lawsuit or whether you are eligible to participate in class action settlements or litigation nor do we initiate or participate in litigation to recover damages on your behalf for injuries as a result of actions, misconduct, or negligence by issuers of securities held by you.
